Company Overview

About Us

We are a team of passionate individuals dedicated to building dreams and creating spaces that inspire. From the moment we pick up our tools to the final touches on a project, we pour our hearts into every detail. With each brick laid and every beam secured, we feel an overwhelming sense of pride knowing that we are shaping the world around us.

Our journey in the construction industry has been filled with challenges and triumphs, but through it all, one thing remains constant - our unwavering commitment to excellence. We thrive on the excitement of bringing visions to life and exceeding expectations. As we embark on new projects, we are fueled by the opportunity to leave a lasting impact on communities and individuals alike. Together, let's build a future where dreams take shape and possibilities become reality.

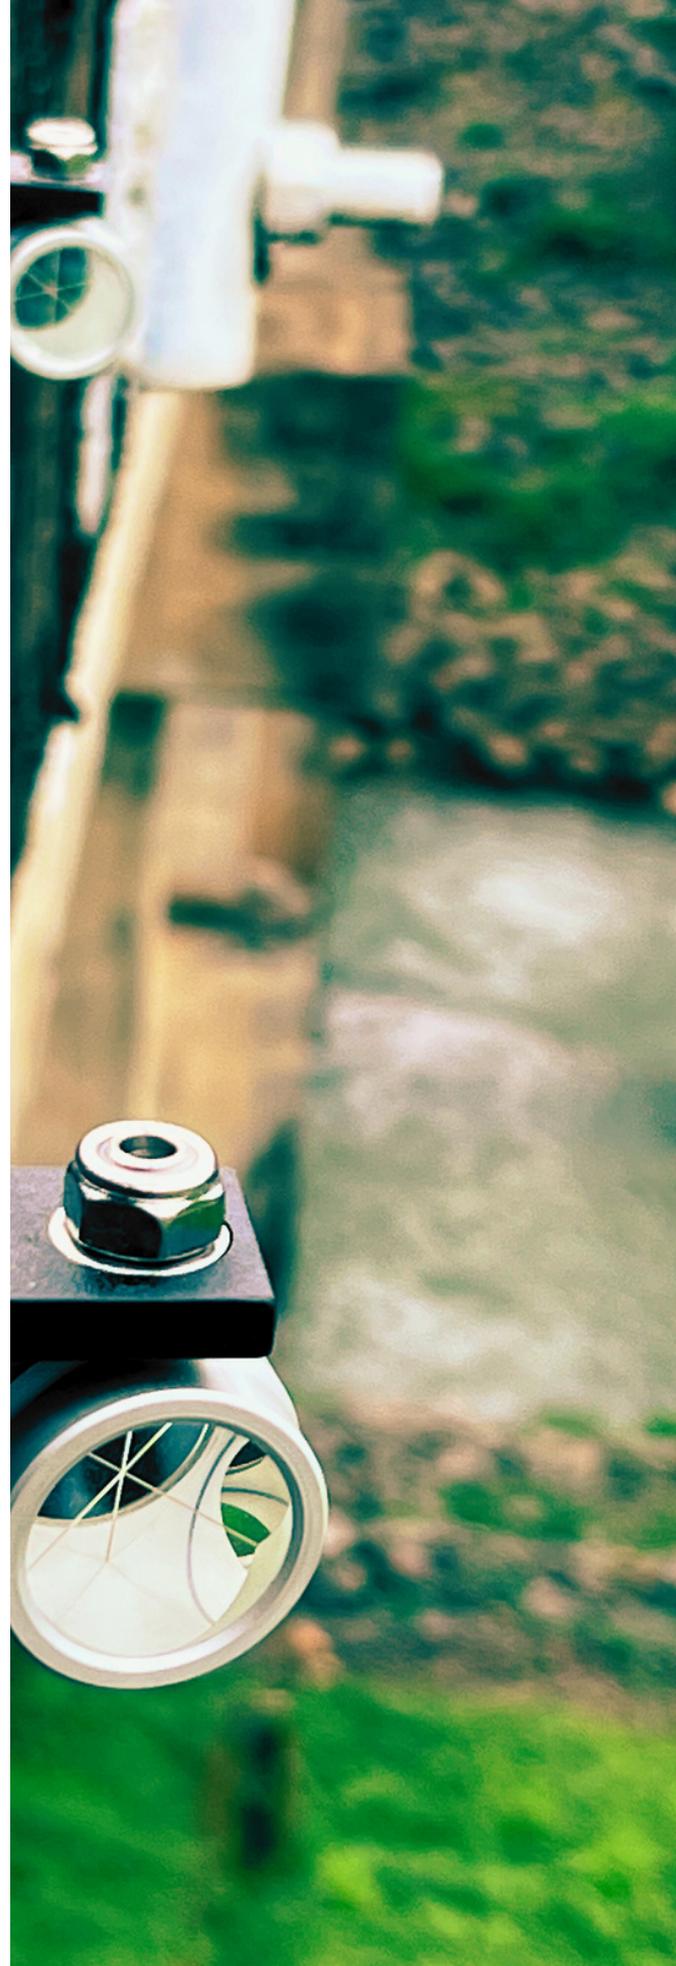

Our Process

Mission

Our mission is to deliver high-quality construction services through skilled craftsmanship, attention to detail, and a commitment to exceeding client expectations. We strive to build long-lasting relationships with our clients, employees, and community while embracing environmentally friendly building practices.

Vision

To be the most trusted and innovative construction company, known for excellence in craftsmanship, customer satisfaction, and sustainable building practices.

Company Values

Welcome to our construction company, where excellence meets innovation. When you choose us for your construction needs, you choose a team with an unwavering commitment to quality and customer satisfaction. Our skilled and experienced crew is dedicated to bringing your vision to life, using the latest techniques and materials to ensure a result that exceeds expectations. With our construction services, you can expect seamless project management from start to finish. From initial consultation through design and execution, we prioritize open communication and collaboration with our clients every step of the way. Our attention to detail ensures that even the most complex projects are completed on time and within budget, giving you peace of mind throughout the process.

When you partner with us for your construction project, you gain access to a comprehensive range of expertise in various areas, such as irrigation projects, residential builds, commercial properties, or industrial facilities. With our dedication and skillset at your disposal, there are no limits to transforming ideas into breathtaking structures that stand the test of time.

What We Do

CONSTRUCTION SERVICES

Cutting-edge innovation, Expert Craftsmanship

Our construction services leverage state-of-the-art technologies and a highly skilled workforce to deliver exceptional results. By incorporating the latest tools and techniques, we ensure precision, efficiency, and top-quality outcomes for every project. Our expert craftsmen bring years of experience and expertise to the table, guaranteeing that your construction needs are met with the utmost skill and proficiency.

CLIMATE SOLUTIONS

Our geospatial solutions rely upon advanced technology, providing a much more comprehensive understanding of climate and agriculture information than traditional methods. By leveraging modern technologies, such as artificial intelligence and machine learning algorithms, we're able to process data into incredibly accurate findings quickly. This ensures that our clients always have access to the latest, most accurate insights for informed decision-making

CUSTOM SOFTWARE SOLUTIONS

Are you overwhelmed by the complexity of your Geographic Information Systems (GIS) and engineering projects? Look no further: you've found your one-stop shop for all GIS and engineering project needs! Our custom software solutions provide expert guidance online and offline, so no matter where you are, you can access the support needed to complete any project.

PROJECT CONSULTANCY SERVICES

Climate change is no longer a distant problem; it's here, and its impacts will only intensify. Our consultancy services offer Consultation Services to assist governments, funding agencies, and private organisations in developing and implementing projects focused on building resilience against the changing climate. From assessing vulnerabilities to creating robust adaptation strategies, we provide expert guidance every step of the way.

Projects

GCF Funded Climate Resilient Integrated Water Management Project - United Nations Development Programme (UNDP) Installation of manual depth gauges, flow measuring and rain gauges, conversion of area capacity curves, development rating curves and SOPs for water management in the tank cascade systems.

Minor Irrigation Tank Engineering Surveys (82 tanks) - Department of Agrarian Development
The baseline survey, Need assessment and Surveying, CAD drafting, Design, Volume calculation, and Boundary demarcation.

Supply of Laboratory Equipment - Department of Agrarian Development
Activities: Supplied Agro-MET Stations, QA&QC Laboratory Equipment and equipment for Water Management and gauging.

Supply of Laboratory Equipment (NRMC) - Natural Resources Management Center (NRMC)
Activities: Supplied equipment for Water Management and gauging.

Ellanga Project Anuradhapura - Department of Agrarian Development Anuradhapura
The baseline survey, Need assessment and Surveying, CAD drafting, Design, Volume calculation, and Boundary demarcation.

Ellanga Project Vavuniya - Department of Agrarian Development Vavuniya
The baseline survey, Need assessment and Surveying, CAD drafting, Design, Volume calculation, and Boundary demarcation.

Towns East of Colombo Water Supply Project - Access Engineering PLC
Towns East of Colombo Water Supply Project

Consultancy Services for Mahaweli Authority of Sri Lanka - Mahaweli Authority of Sri Lanka
Installation of Automated Geodetic Survey Systems in Victoria Dam

Consultancy Services for Hambantota Port Project - Phase III - Central Engineering Consultancy Bureau (CECB)
Hambantota Port Project - Phase III
Activities: Topographic/ Bathymetric survey at Hambantota Harbour Dockyard project

Hydro Power Project at Upper Kothmale - Maeda Nishimitsu JV
Activities: Setting Out of Tunnels, Power House, Penstock, Switchyard and related services
Construction and Hydrographic Surveys in Maldives

Vilifushi Islands Maldives - Boscalis international b.v. (Holland)
Construction Survey in Vilifushi Islands Maldives (Tsunami aided project) done by Boscalis International b.v. (Holland).
Hydrographic and Topographic Survey at G.A.Villingili in the Maldives for Harbor Construction preliminary investigations.

Oluvil Port Project - MTHojgaard
Oluvil Commercial and Fisheries Harbor Project

Automatic GNSS Guided Piling System - ELS Construction (Pvt) Ltd
Installation of Automatic GNSS Guided Piling System for Hulumale (Maldives) Airport expansion project
Activities: Implementation, Installation and testing of DPS900 Guidance system for piling site

Overview

In-house Experts at Your Service

Geo-Info Mapping Private Limited employ number of experts who are best at what they do. Construction experts to Irrigation experts they always come through when it comes to your needs.

Large Number of Expert Consultants

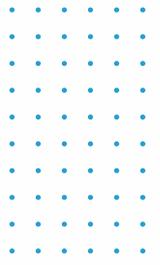

Geo-Info Mapping Private Limited has partnered with many industry experts who are working as expert consultants in the fields of GIS, Irrigation, Construction, and Geology and Environmental science. These experts share the same values that our firm virtue.

Technology at its Best

Geo-Info Mapping Private Limited has the best fleet of technology at its fingertips. We own simple soil auger to highly sophisticated Survey grade UAVs to fulfil your needs. We hold workstations supported with state-of-the-art software to cater your needs.

Clients

We cater to local and international organizations in their projects by providing support and resources tailored to their needs. We collaborate closely with our partners to ensure our efforts align with their goals and objectives. Our flexible and adaptable approach allows us to work with a wide range of organizations and stakeholders. From community-based initiatives to large-scale international projects, we are committed to promoting sustainable practices and protecting the Earth's natural resources at all levels.
